

BTST Stock Alerts

Title: *BTST High Volume Breakouts – July 4, 2025*

Prepared by: Investaid BTST Analysis Unit

What is BTST?

BTST (Buy Today, Sell Tomorrow) is a high-risk, high-reward strategy where traders buy equity stocks today and square them off the next day before market opens. It capitalizes on intraday momentum, news-based spikes, and volume breakouts.

Market Outlook for BTST:

With the Nifty and Bank Nifty showing low intraday volatility, BTST is working well for news-based breakouts, high FII inflows, and stock-specific momentum.

Today's BTST Picks:

Stock	Entry	Target	SL	Reason
COALINDIA	₹476	₹487	₹470	Breakout from consolidation + OI spike
JSWSTEEL	₹891	₹905	₹884	High delivery + sector leadership
HDFC	₹2880	₹2915	₹2860	Price–volume strength + RSI 58

Key Strategy Tips:

- Place strict SL as gap-downs can cause losses.
- Exit at 9:20–9:25 AM if target is hit in pre-open.
- Use BTST only with trending market confirmation.

Risk Disclosure:

BTST trades are speculative and should be used with defined capital only.
